

ISP Protocol for Remote Monitoring

Name of Individual _____

Date _____

	Read the following statements and indicate whether this task has been completed	Yes	Comments
1.	An assessment shall be conducted to determine the individual's needs and appropriateness for remote monitoring services.		
2.	The team shall discuss the results of the assessment and analyze potential risks and benefits of the services.		
3.	If it is determined that technology is appropriate and can ensure health and welfare, a provider shall be selected and a "Remote Monitoring Plan" (RMP) shall be developed.		
4.	The RMP shall be incorporated into the ISP and shall clearly address the following items:		
4a	Type of technology that will be used, whether leased or purchased, and intended outcome from the service.		
4b	Identify whether or not back up supports are necessary to ensure health and welfare. If needed, identify who the back up supports shall be, whether paid or unpaid and necessary contact information.		

4c	Clearly indicate the circumstances in which the back up supports should be contacted, the expected timeframes within which they should respond and whether or not they need to respond in person or by other means of contact.		
4d	Identify circumstances when the individual's guardian, SSA or other team members should be contacted or address other action that should be taken as needed.		
5	Upon completion of the above protocol, the individual/guardian shall provide informed consent for the service(s) and payment authorized as appropriate.
